

Water Rules and Regulations

Section 8.3

Separate water meters shall be installed for each apartment in new apartments building construction, except assisted living and other buildings that will not be subject to future condominium conversions as agreed by an owner by deed restriction. A water meter shall be installed in any apartment complex to be converted to condominiums before such conversions take place. Effective January 1, 2010 all existing multi-family buildings shall be charged for water based on the meter serving the building or the housing unit. There shall be no adjustment of the water bill to reflect sub-metering unless the meters have been installed by the Town nor shall the water bill be revised to estimate individual housing unit use.
