RE: Notice of Storm Water Outfall Inspection

As part of the Town's efforts to provide its residents with clean water and pursuant to Chapter 20 of the Tewksbury Town By-laws (Municipal Storm Water Discharge By-law), the Town of Tewksbury will be engaging in efforts this summer to map and detect storm water outfalls. This detection will consist of visually inspecting the outfall structures and collecting information for the Town's database with a GPS unit. Although the Town anticipates that most work will take place on public property, there will be instances where it may be necessary to access private property. All Town personnel will be properly identified with an ID badge. If you have any concerns about the identity of the person performing the outfall inspection on private property, please contact the Tewksbury Police Department to verify that the identification matches the list of personnel. Please note that you are not required to be home if an outfall inspection is being performed on your street. Inspections will be taking place between the months of June through October. Inspections will be conducted between the hours of 8:00 AM and 4:00 PM, Monday through Friday. If you would like more information about the project, please contact the Engineering Division at 978-640-4440.
