RE: Water Main Replacement from Marston Street to Adams Road

DATE: October 19, 2016

The Town of Tewksbury, under contract with Joseph P. Cardillo & Son, Inc. (Contractor), has completed the installation of the temporary bypass water piping system and is now ready to transfer your water service. This will require an employee from the Town's Water Department to enter the basement of your home to shut off your existing service at the water meter. Temporary hosing will then be installed by the Contractor from an outside spigot on the house to the temporary piping run along the side of the street.

Please be advised that the work outlined above will begin tomorrow (Thursday, October 20th) and should be completed within a couple of days. In advance, we ask that you allow the crews access to your home to complete the transfer of water service to the temporary bypass piping system. Construction of the new replacement water main in the street will then begin later next week.

For further information and updates on this project please visit the webpage for the Engineering Department on the Town website. We appreciate your cooperation and patience in advance. If you have any questions regarding this project, please contact Kevin Hardiman, at the Department of Public Works at 978-640-4440, ext. 238.
